

## Monarch Ex pleated retractable insect screen "barrier free design"

### Applications

Entry Doors  
French Doors  
Bi-Fold Doors  
Stacker Doors  
Pivot Doors  
Timber Sliding Doors  
Alfresco Rooms

### Overview

Monarch Ex is possibly the most innovative retractable screening system on the market; the perfect solution for screening French doors and Bi-fold doors.

The revolutionary pleated retractable screen incorporates our "industry first barrier free threshold."

The floor guide is just 3mm high and combined with our unique retracting mesh guide eliminates the trip hazard associated with traditional retractable insect screens.

Mesh retention clips are installed top and bottom of the mesh keeping the mesh in place in windy conditions.

The screen is smooth and easy to operate as there are no tension springs or counter balances used to operate the screen.

The sliding bar stops at any position along the opening without the need of a brake or locking system.

Monarch Ex is predominantly suited for recess mount applications inside the door frame or the reveal of the opening. The screen is equally suited for face mounting using various build-out adaptors.

### Size Range

Single Slide one direction  
2.4m high up to 2.0m wide  
2.8m high up to 1.3m wide
