

## Monarch Screen

pleated retractable insect screen  
"self retracting"

### Applications

Entry doors  
Laundry doors  
Garage entries  
Cavity sliding doors

### Overview

Monarch Screen is ideally suited for small doorways such as laundry doors, garage entries and cavity sliders or in situations where installing a conventional swing fly door is not possible.

This convenient to operate screen is ideally suited to the DIY consumer or professional installer looking for a budget priced solution for screening small doorways.

Monarch Screen is easy to operate due to our innovative "one touch" latch concept that keeps the screen securely in opened position. To close the screen touch the latch and the screen will retract effortlessly due the unique counter weight retracting system that is concealed in the handle bar.

Installation is easy and is suitable for the home handyman who is confident in cutting aluminum.

Monarch Screen is design as a recess mount system and as such is generally installed inside the door frame or within the reveal.
