

Ez Screen flat mesh retractable insect screen "UPVC or Aluminium frame"

Applications

Awning windows
Casement windows
Double Hung Windows

Overview

This budget range of flat mesh retractable insect screens is perfect for use on double hung windows, awning/casement windows and small servery installations.

Ez Screen is available in either UPVC or powder coated Aluminium frame as well as the choice of face mount or recess mount installation.

UPVC is perfect improving thermal efficiency and is particularly suitable for use on UPVC and thermal break windows. The face mount option is ideal for use on windows where there is no room to install inside the reveal or window frame.

Double sided adhesive tape is used to install the face fix screen option, eliminating unsightly fixings and improving installation times.

The screen features a Viscodynamic "soft close" brake system that gently recoils the mesh into the protective cassette preventing the screen from slamming shut with undue force.

The screen has a variable speed tension adjuster that is conveniently located on the mesh housing.
