Before ordering your Monarch Screen please read the information below:

Monarch Screens are designed to fit most openings there are a few important checks that must be carried out prior to ordering.

1. Ensure there is a minimum 5mm clearance between Monarch Screen and any frame member/handle etc.
2. Make sure the structure is square within 10mm. Note out of square openings may effect the operation of the screen.
3. Please take extreme care when taking measurements ensuring Monarch Screen will fit your opening.
4. Please ensure you select Colour, Design Configuration and Size before faxing quote form.

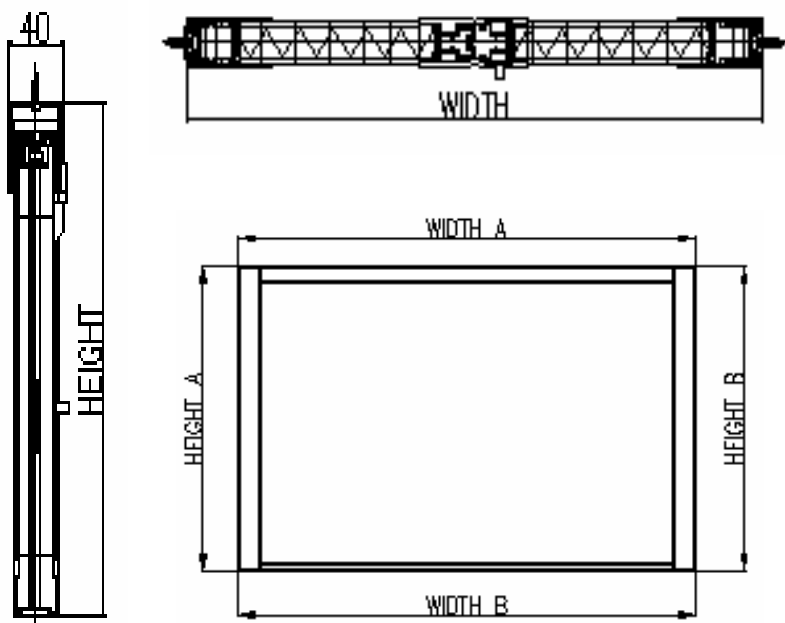

Important Notes:

It is not recommended to fit Monarch Screens to rough or un-even surfaces, such as paving or stamped concrete.

Do not fix directly to carpet or vinyl flooring. A timber or Aluminium sill plate must be installed first.

If installing a sill plate ensure you make allowances in your vertical measurements.

Each Monarch screen is custom manufactured to suit your request and as such no credits or returns will be accepted due to dimension or installation errors.
